

kgclock

Ver 1.2

Desktop clock for X Windows. For clean operations kgclock requires a Compositing Window Manager. Developed using Kulina Graphics Library for LINUX, and designed using kgDevelop, a GUI application developer for Linux. Kulina Graphics Library uses GraphicsMagick for image processing and hence depends on GraphicsMagick and all dependencies of GraphicsMagick. For audio alerts 'aplay' is required. Reading message is supported using 'flite' which is built in.

A Free Software, Distributed under GPL

a product of KULINA SYSTEMS, TRIVANDRM. INDIA
